Battle of History

www.igrzyskawolnosci.pl

The City of Lodz has the ambition to co-organize the best intellectual and cultural forum of ideas in Poland – a meeting of eminent representatives of academia, culture, science, non-governmental activists, as well as entrepreneurs and politicians.

Our ambitions came true in 2018, as the Freedom Games forum took on a scale and prominence before our very eyes. The program of the fifth edition of Freedom Games was a breakthrough, thanks to which we have entered the top shelf of similar events not only in Poland, but also in Europe. This is the basis for organizing this unique event in Łódź also in the future – a cultural and political “Davos of Central and Eastern Europe”, with a clear pro-democratic, educational ideological approach, which at the same time encourages the participation of our residents.

Freedom Games constitute an event with an important educational mission, thanks to which residents of our city have the opportunity to meet and talk to the leading representatives of the academia from around the world. So far, during Freedom Games, we have hosted representatives of Cambridge University, Princeton University, Berkeley University, Massachusetts Institute of Technology, Harvard, and the University of Paris, among others.

Our city intends to continue our strategic cooperation with the organizers of Freedom Games in the following years. This is why I would like to already invite you to join the next year's edition, which will held in early autumn 2019. At the same time, I encourage you to cooperate with the organizers, Liberté! Foundation. See you in a year!

Hanna Zdanowska
President of the City of Lodz

The leading topic of the 2018 edition of Freedom Games was devoted to Battle of History. This is precisely why we took up the gauntlet in the fight for memory. We are capable of reclaiming the ideals of civil and brave Poland that does not have to amend its history to be proud of it. We discussed the notion of patriotism as a manifestation of responsibility and the idea of *raison d'état*. All this in the company of renowned historians from all around the world in a bid to explain the impact of international historical processes on societies and to emphasize the importance of European integration in creating peaceful Europe and ensuring well-being in Poland. We also tried to defend the idea that a Common Europe truly constitutes Polish *raison d'état* and that responsibility and dialogue are the cornerstones of civic society.

Thanks to the effort of our team and cooperation with fantastic partners during the three days in November Lodz became the alternative capital of celebrating the centenary anniversary of regaining Polish independence – a colorful and open oasis for Poles–Europeans, the stronghold of responsible patriotism and joyful celebration of Polish independence.

This year, Freedom Games were attended by over 3,500 participants. This is, without any doubt, something to be proud of and what will drive our work in the next years. We would like to thank everyone for their cooperation and participation in the fifth edition of the forum. I would also like to already invite you to Freedom Games 2019, planned for autumn 2019. The main theme of the forthcoming edition shall be the phenomenon of populism. We intend to consider whether stopping “The Winter of Nations” is still feasible. We invite you to cooperate with us. It is together that we create the most inspiring forums of ideas in Central and Eastern Europe.
